Summary

Automation Test Engineer with hands-on experience in Java-based test automation using Selenium WebDriver, TestNG, and Cucumber. Strong understanding of SDLC/STLC, functional and regression testing, and API validation. Experienced in testing web and POS applications in Agile environments, with exposure to CI-ready automation and collaboration across cross-functional teams. Motivated to contribute to high-quality, reliable software in banking and payments domains.

Experience

Jul 2025 - PRESENT

Analyst

Capgemini Technology Services India Limited (Pune)

- Designed and implemented 20+ Java-based automated test cases using Selenium WebDriver, TestNG, and Cucumber for web and POS workflows, improving regression test coverage.
- Executed functional, regression, and smoke testing aligned with SDLC/STLC processes.
- Refactored automation components using reusable design patterns, reducing maintenance effort by ~30% and improving execution reliability.
- Validated backend logic by testing API responses, data consistency, and business rules in collaboration with backend and frontend teams.
- Contributed to CI-ready automation suites using Git and Maven, supporting faster and more stable releases in an Agile environment.
- Performed defect analysis, root cause investigation, and coordinated with developers for timely resolution.

Education

2021 - 2025

Chandigarh University (CU), Ajitgarh, Punjab

Graduation • B.Tech/BE (Bachelor Of Technology/Bachelor Of Engineering) • Computer Science And Engineering
CGPA - 8.24

Certification

Java Programming (Learn Quest)

[Certificate Link](#)

The specialization focused on Java features and functions and included many hands-on exercises to practice new skills and build fully functional Java web and mobile applications.

Cloud Computing (NPTEL)

[Certificate Link](#)

Gained a solid understanding of core cloud concepts including cloud architecture, service models (IaaS, PaaS, SaaS), virtualization, and deployment models.

Google Associate Data Practitioner

[Certificate Link](#)

Google-certified Associate Data Practitioner with working knowledge of SQL, BigQuery, and Looker for data querying, transformation, and visualization. Experienced in data preparation, exploratory analysis, dashboard creation, and understanding modern data workflows including pipelines, governance, and analytical best practices.

Skills

- | | | |
|----------------------|--------------|-----------|
| • Java | • Jmeter | • MongoDB |
| • Selenium WebDriver | • Git | • Jenkins |
| • TestNG | • Maven | |
| • Cucumber | • Javascript | |
| • Postman | • Node.js | |

Projects

Yelp Campgrounds – Full Stack & Testing Project

- Developed a full-stack web application using Node.js, Express.js, MongoDB, and REST APIs.
- Designed and executed functional and API test cases using Postman to validate authentication, authorization, and CRUD workflows.
- Performed negative and boundary testing to identify edge cases and ensure data integrity.
- Implemented user authentication and authorization with secure session handling.
- Built a responsive UI using HTML, CSS, JavaScript, Bootstrap, and React.
